

Work Experience

Creative Media Staff	Student Executive Board (BEM Kema) FMIPA Unpad Sumedang, Indonesia	May 2024–Jan 2025
The central executive governing organization manages communications, administrative workflows, and digital media for a faculty of several thousand science and mathematics students. - Designed high-impact digital assets and user-centric layouts for social media, including static posts, carousels, Reels covers, and cohesive single-row feeds, tailored for an audience of over 102,000 unique accounts. - Co-led the creative team in establishing comprehensive design systems and brand guidelines, defining the core logo, typography, and foundational visual elements to ensure aesthetic consistency across all digital touchpoints. - Iterated on visual content based on quantitative performance metrics, optimizing design formats to drive 93.4% of total engagement and contributing to 2.7 million views over a 90-day period.		
Social Media Staff	Association of Electrical Engineering Students Unpad Sumedang, Indonesia	Jan 2024–Jan 2025
The official department association overseeing technical projects, student development, and large-scale digital administration for the Electrical Engineering program. - Collaborated cross-functionally with department teams to build and enforce a strict organizational brand identity, designing the main logo, specific sub-logos for individual departments, and standardized typography guidelines. - Produced engaging visual content for Instagram, encompassing static posts, carousels, Reels covers, and seamless feed rows, that directly contributed to an 85.3% increase in reach (42,253 accounts). - Managed a high-volume library of digital assets and executed targeted visual campaigns that captured measurable engagement spikes, including up to 6,773 interactions per campaign.		
Head of Information Media	Bureau Student Parliament (DPM) HMTE Unpad Sumedang, Indonesia	Jan 2025–Present
The legislative and supervisory body of the Electrical Engineering student association, responsible for student advocacy and organizational oversight. - Spearheaded the organization's overarching "Grand Design" and comprehensive brand guidelines, establishing a cohesive visual identity across all legislative and public-facing communications. - Designed and standardized core visual assets, including the official DPM logo, typography, and design templates, ensuring strict aesthetic consistency for all branding initiatives. - Managed and curated content for official social media platforms, overseeing the end-to-end production of digital campaigns to effectively communicate legislative updates and engage the student body.		

Projects

Financial Fraud Detection & Customer Segmentation ML Pipeline [GitHub Repo]	May 2026–Jun 2026
- Developed an end-to-end Machine Learning pipeline focused on financial risk mitigation and behavioral analytics as a Capstone Project for Dicoding Academy. - Engineered a supervised learning pipeline using Random Forest and Decision Tree classifiers to detect fraudulent transactions, incorporating systematic majority-class downsampling and hyperparameter tuning to eliminate model bias. - Integrated an unsupervised learning workflow using K-Means Clustering and Principal Component Analysis (PCA) to segment customers based on transactional behavior, serializing optimal models using Joblib within an .h5 framework for deployment.	
Risk Profiler: Automated Credit Risk Assessment & Explainable AI for MSMEs [GitHub Repo]	Jan 2025–Present
- Developed an end-to-end Machine Learning pipeline as a Top 800 final project for the PID1 Digdaya x Hackathon 2026, designed to automate credit risk profiling for MSMEs. - Built a robust Python pipeline covering data cleaning, custom financial feature engineering (QRIS volume and utility delay ratios), and a data leakage-free RandomForestClassifier using SMOTE within StratifiedKFold validation (generalization gap less than 0.026). - Integrated Explainable AI using the SHAP framework to auto-generate natural language risk explanations for loan officers, and deployed the entire system as a production-ready REST API microservice using FastAPI and Pydantic schema validation.	

Education and Certifications

- **Bachelor of Engineering in Electrical Engineering**, Universitas Padjadjaran, Indonesia. **2024–2028**
- **EFSET English Certificate (C1 Advanced)**, EF Education First. **Feb 2026**
- **Introduction to Generative AI**, Pijak in collaboration with IBM SkillsBuild. **May 2026**
- **Belajar Machine Learning untuk Pemula**, Dicoding Indonesia. **Jun 2026–Jun 2029**
- **Belajar Dasar Data Science**, Dicoding Indonesia. **Jun 2026–Jun 2029**

Technical Skills and Proficiencies

- **Data & Machine Learning:** Python, Machine Learning, Data Analysis, Explainable AI (SHAP), FastAPI
- **Software & Design:** Microsoft Excel, Microsoft Visio, Figma, Adobe Illustrator, Adobe Photoshop, Filmora
